

Patrick Wagler

Chemist, Dr. rer. nat.

born March 23, 1968 in Berlin, married, one daughter

Professional experience

Project Manager, Forschungszentrum Jülich, 2015 - to date

Coordination of research and innovation funding programmes in biotechnology, life sciences and technology transfer, Funding program „**SME-innovative: Bioeconomy**“

Group leader, Ruhr-Universität-Bochum, 2005 - 2015

Research group »Biomolecular Information Processing« chair Organic Chemistry, main research focus: »reconfigurable microfluidic systems for Biochemistry application«

Cofounder & CEO, protostream GmbH, Dortmund, 2005 - 2010

Company objectives: conception, fabrication and cooperative marketing of bio- and nanotechnological products for »Life Science« industry

Visiting professor, Coordinamento Interuniversitario Veneto per le Nanotecnologie & European Centre for Living Technology (www.ecltech.eu), 2004 - 2011

Degree course »Nanobiotechnology«

Group leader, Fraunhofer Gesellschaft, Sankt Augustin, 2000 - 2005

Research team »BioMIP«, field of activity: »Evolvable microsystems«

Research associate, Institut für Mikrotechnik Mainz GmbH, 1997 - 1999

Department Thin Film Technology, research focus: »Medical Microsystems«

PostDoc, Plataforma Solar de Almería, Spain, 1996

Research area: »Photochemical Organometallic Catalysis«

Research associate, Leibnitz Institut für Katalyse Rostock, 1993 - 1996

PhD in Organic Chemistry, minor field of study: pharmacology & toxicology.

Education and studies

Universität Rostock, Degree: Diplom-Chemiker, 1993

Basic military service, 1986 – 1988

High school (special classes for chemistry), Technical University Merseburg, 1986

Skills and expertise

ORGANISATION & MANAGEMENT:

Leadership experience as group leader in an interdisciplinary environment for many years; practical experience in validation of new technologies and research results; excellent project management as well as communication and presentation skills.

TECHNOLOGIES & SPECIAL KNOWLEDGE:

Expert knowledge and laboratory experience in microfluidics for bioanalytical applications; Long-term expertise in characterisation and fabrication of chip-based separation devices (e.g. CGE), fluorescence detection as well as their application in biochemical systems; clean room and thin-fin technology experience; Biophysical scientific methods of measurement as well as modification procedures of surface properties to improve biocompatibility & wettability.

Patrick Wagler

Chemist, Dr. rer. nat.
